

Stackable Guide

It's time to power up your clinical possibilities with Swissmeda from Carestream Dental.

Digital dentistry, virtual implant planning, guided surgery and assisted diagnosis continue to advance positive outcomes for doctors and patients alike. Now, Swissmeda provides easy-to-use software solutions that provides quality planning and treatment on even the most challenging All-on-X cases. Plus, make your case collaboration even smoother and improve access for your partners and referrals with in-built communication tools.

Let Swissmeda's software and data intelligence deliver more predictable outcomes and increased efficiency and profitability.

Learn more about **Stackable Guide**

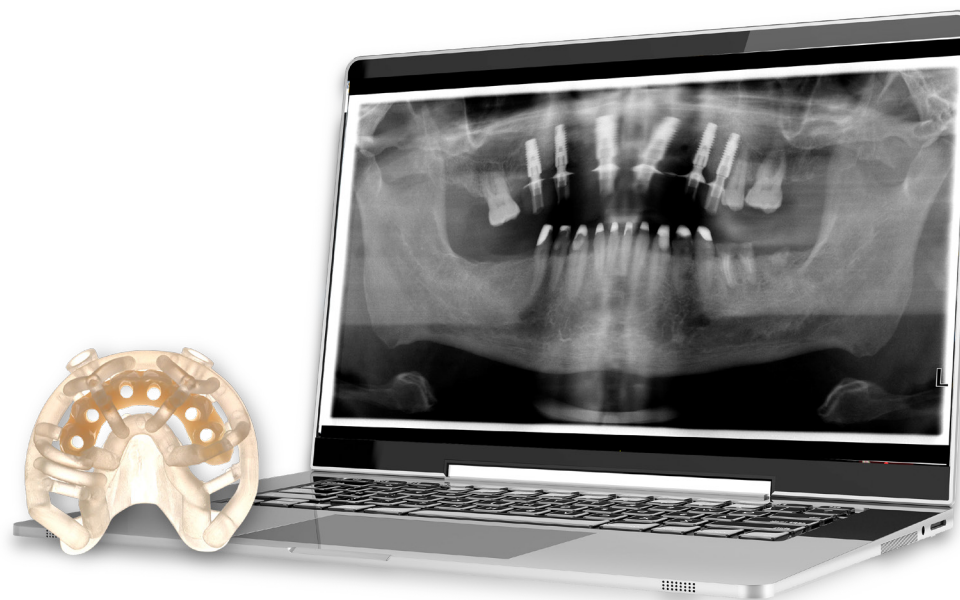

Stackable Guide

Whether integrated with Smop or as a standalone application, New stackable guide technology features a comprehensive digital 3D design process to create an efficient and reliable solution for complex All-on-X procedures.

Simple, easy to follow 1-2-3 workflow

Stackable Guide provides an easy guide to facilitate successful multi-stage surgeries, as intuitive as 1-2-3. With its simple, interlocking pin mechanism, open guide design and flap holders, clinicians can seamlessly perform the most challenging procedures with confidence and accuracy.

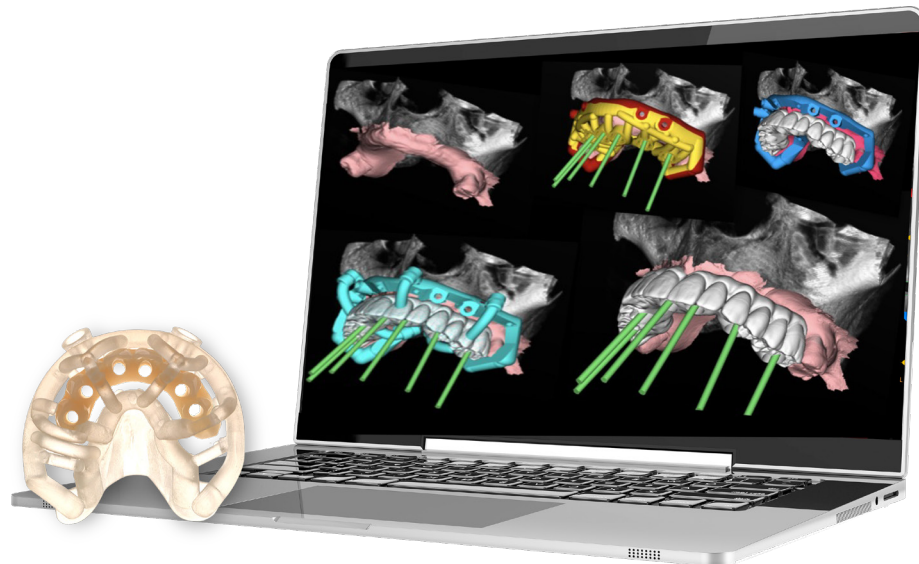

Cloud-based Planning: 24/7 Convenience at Your Fingertips

The only fully cloud-based planning platform on the market, clinicians and labs can efficiently collaborate and plan surgeries—anytime, anywhere. Featuring built-in communication tools, data storage and transfer capabilities, Stackable Guide includes unique and advanced means to easily collaborate on the most complicated of procedures in oral healthcare.

Stackable guides can be designed entirely within the Smop software—or designed as part of a standalone solution—with no need for third-party software applications. Stackable Guide also works effectively and seamlessly with all implant manufacturers.

Why Stackable Guide?

- Improved bone preservation achieved with sloped approach to bone reduction
- Reduced costs of final prosthesis by reducing need for multiangle abutments
- Convenient, built-in communication tools, facilitating case coordination and planning
- Simplified workflow and communication for complex surgeries
- Patented open skeletal design with interlocking pin system
- Improved bone preservation through angled splitting

Implant Solutions for Every Need

Stackable Guide is part of a suite of implant solutions offered by Swissmeda. Be sure to explore all Carestream Dental's implant planning portfolio can do for you, including intuitive surgical guide design, easy collaboration tools and prosthetic-driving implant planning.
